

# **Shaderite**

Window Furnishings

The finest  
blind of  
its kind

by

**Crank-It  
Wire Guide  
Robusta**

Our Shaderite CRANK-IT eliminates the need for any ropes, pulleys & awkward tie down points. Using channels to guide both fabric & bottom rails, the Shaderite CRANK-IT combines both flexibility & simplicity. The CRANK-IT comes standard as crank control or optioned for remote control. Fabric, hardware & architectural elements can be colour co-ordinated for every application.

Our Wire guide uses the same heavy duty proportions as the CRANK-IT whilst replacing the channels with stainless steel guide cable to further blend in to its environment.

The Robusta is based on the robust top roller system of the CRANK-It whilst opting for a 4 sided bottom rail coupled to heavy duty pivot arms. This allows a pivot arm awning with very large proportions & drops.

## Features

Our 70, 78 & 85mm top rollers provide consistency & reliability over larger spans & drops.

Available with optional stainless steel fittings.

Wide choice of fabric options.

Easy crank handle operation.

Fabric tensioning & locking systems.

Sliding idle pin.

Remote Control.

## Benefits

Suitable for open plan decks & living areas.

Stands up to the harshest of coastal exposure.

Complements all applications & facades.

Simple & quick movement for the ultimate in shade adjustment.
